ABOUT ME

I am a web developer, can be said as a software engineer. The role is very appealing to me, and I believe that my strong technical experience and education as web developer make me a highly competitive candidate for this position.

- My strengths that would support my success in this position include is :
1. I have successfully designed, developed, and supported live-use web applications.
 2. I can plan my time and thoughts well to implement on work or project.

"The most important win, is win against your previous self"
